What is an electromagnet? An electromagnet is a magnet that runs on electricity. Unlike a permanent magnet, the strength of an electromagnet can easily be changed by changing the amount of electric current that flows through it.

Answers to SRF Questions | Jefferson Lab

If you put the right bud in its case, it will automatically turn off, cutting off the signal to the left bud. see less To expand on the previous reply, the answer is "yes, but." The right earbud is the bud that receives the Bluetooth signal from your source. It then retransmits the signal to the left bud. So, if you want to use only the right bud and keep the left bud in its charging case, that will work fine as long as you stay within Bluetooth range of your source.

Questions and Answers - Science Education at Jefferson Lab

Answers. Best answer: 1. Technically, yes, but letting lithium batteries go unused for long periods of time is bad for them in general. Keeping them in the case is on the balance probably better for them than the alternative of letting them sit outside the case since it'll take longer for them to run completely dry, at which point they won't be able to accept a new charge.

Remember that the nucleus is made up of protons and neutrons. So, if we want, we can write: $\text{Mass Number} = (\text{Number of Protons}) + (\text{Number of Neutrons})$ For krypton, this equation becomes: $84 = (\text{Number of Protons}) + (\text{Number of Neutrons})$ If we only knew how many protons krypton has, we could figure out how many neutrons it has.
